A PERSONAL NOTE

27 NOVEMBER 2026

Dear Aparna,

Thank you for the thought you've given to Universe Zodiac. You helped me see what it could become.

I've decided to take it forward. The numbers show that more and more people in India are turning to Western astrology. I believe this is the right time to bring Universe Zodiac to readers around the world in their own languages.

I'm putting the system together now. There's a little more work to do, and it should be ready soon. I'll take care of the website, the technology and everything that needs to be set up.

Most of the work will be automated, but I'd still like Universe Zodiac to have a familiar face. You were the first person to show me what this idea could become, so I wanted to ask you first.

> ## Would you like to be the face of Universe Zodiac?

Universe Zodiac follows Western astrology and uses the Swiss Ephemeris to calculate planetary positions. If you have any reservations about that approach, I'd like to hear them. Please feel free to tell me what you think.

Take your time and reply whenever it suits you.

With thanks,

Ajeesh Abu

UNIVERSE ZODIAC

A little perspective. A little more you.
